

ELASTOLOGY®

Sacred Lotus Skincare

Clientele's Exclusive Beauty Secret...

Clientele's unique formulas contain a special ingredient you won't find in any other skincare line... the extract of the Sacred Lotus Seed. Clientele has been awarded a United States Patent for Lotus Skincare Technology and additional worldwide patents are pending.

Thousands of years ago, in Egypt, Pharaohs and Queens knew the potent powers of the magical, mystical Sacred Lotus. In India and China, Buddhist Monks cherished the Lotus. They cultivated Lotus blossoms in the rivers and believed they held the secret of life. They knew there was something about the Lotus that was unlike any other flower.

UCLA Scientists made a startling discovery:

UCLA Scientists isolated Lotus Seeds over 1000 years old from a Chinese lake bed. They planted the ancient seeds. To their amazement, the seeds sprouted into healthy, young Lotus plants. The seeds had resisted the aging process for over 1000 years!

Youthifying breakthrough...

The scientists discovered antioxidants and the methyltransferase enzyme within the Sacred Lotus Seed. When Clientele's Skin Care Experts tested an extract of the Sacred Lotus Seed in their new skincare formulas, they were amazed at what they found: The products helped make the skin look younger and more beautiful.

Elastology® The Science of Improving Elasticity®

Skin is composed of collagen and elastin fibers that allow your skin to move, stretch and recover. Between these fibers is a vital protein-sugar complex, Glycosaminoglycans, which serves as a moist, delicate reservoir supplying vital nutrients and "cushion" to your skin.

Clientele Dermatologists developed Elastology® to help improve the skin's elasticity, tone and the resiliency of healthy tissue. The secret to Elastology® is in our unique **5-Part Super Firming Complex** which helps you hydrate and firm your skin with natural elements found in young skin that can improve the look of your complexion. It is designed for all ages, all skin types... for women & men!

You can't stop the aging process, but with Elastology® you can help your skin look younger longer. From the hottest sunny climates, to the coldest snowy days, Elastology® can help you maintain firm, youthful, beautiful looking skin.

Look Young. Feel Young. Be Young.
CLIENTELE®
